**Subject:** Llanddewi Velfrey bypass

Dear sir/madam,

We currently live at \_\_\_\_\_ and personally we cannot wait to have a bypass.

There are several reasons for this which include - The speed at which traffic travels through the village ( not only cars but lorries too) , although there is a 40mph speed limit a lot of people do not adhere to this.

We have a child soon to be two children in secondary school who have to cross the main road to catch the school bus , and as you can imagine this isn't the safest or quietest time of day to do this.

During rush hour the quantity of traffic on the road makes it extremely difficult to enter onto the A40 safely.

During the early hours of the morning, the ferry traffic travels through at speed. It's quantity and speed frequently wakes someone up in the house.

The pavement through the village at times is very thin, with Lorries and cars speeding fast only a few centimetres from you. There have been instances over the years of people/dogs being clipped by passing vehicles.

Having the bypass will take Noise and engine fumes away from the families living in the village.

Thank you for reading our views on the bypass. We really cannot wait for the bypass , it's been forty years in the planning. BRING IT ON!.

Many thanks

Paul and Caroline Davies.
